

BALLINGER WILL  
RESIGN POSITIONRumored That the Secretary of  
the Interior Will Quit.

## DATE OF RETIREMENT SET

Seattle Man Will Leave President  
Taft's Cabinet the Middle of Sep-  
tember—Congressional Committee  
Will Have Reported by That Time  
and the Date is Sufficiently Early  
to Take the Issue Out of the Cam-  
paign.

Beverly, Mass., Aug. 13.—Certain  
events, following incidents of the past  
week or so, lead to the conclusion  
that a complete political readjustment  
in circles close to President Taft is  
in progress.

Senator Nelson W. Aldrich called to  
see the president. He talked with the  
president thirty-five minutes. He  
found that Mr. Taft had not had an  
opportunity to read the senator's re-  
ply to Senator Bristow's charges re-  
garding the rubber tariff. The president  
was gratified, however, that Senator  
Aldrich had consented to make a  
statement. In doing so, it is said, the  
senator from Rhode Island performed  
an act which fitted exactly into a pro-  
gram which has been framed by  
party leaders close to the president.

The elimination of Mr. Aldrich, ac-  
cording to close political observers, is  
soon to be followed by the retirement  
of Secretary Richard Ballinger from  
the cabinet. The Republican party is  
facing one of the most crucial cam-  
paigns in its history this fall, and the  
leaders who have been coming more  
and more into influence with the pre-  
sident are arriving daily to do all they  
can to bring about an adjustment of  
the differences within the party.

Mr. Ballinger practically has lost all  
of his personal fortune in defending  
himself from the attacks that have  
been made upon him. It is said that  
one attorney's fee alone in the con-  
gressional investigation cost him \$10,000.  
If the secretary is to recover these  
losses, it is said, he must soon  
resume the lucrative practice of law  
which he left in his home state to take  
up the duties of head of the interior  
department.

## Date of Retirement Fixed.

The retirement of Mr. Ballinger is  
fixed for Sept. 15. The congressional  
committee will have reported by that  
time and the date is sufficiently early  
to take the so-called Ballinger issue  
out of the campaign.

The third move in contemplation is  
said to be directed against Speaker  
Cannon. It is not admitted in Beverly  
that Mr. Cannon will be even a can-  
didate for the speakership. Representa-  
tive McKinley of Illinois, a close  
friend of Cannon and chairman of the  
Republican congressional campaign  
committee, was asked here the other  
day if he thought Mr. Cannon could  
be elected to the chair again.

"I have not heard that he will be a  
candidate," was the significant reply.  
The Cannon situation, as a thing of  
the future, is a little difficult to han-  
dle. Once it is known that the presi-  
dent would like to see a change, how-  
ever, it is believed that all doubt as  
to the result would be removed.

Reports have reached Beverly that  
the recent results in Kansas and Iowa  
were due largely to the activity of  
Speaker Cannon in Kansas, to the  
charges against Senator Aldrich and  
doubt in the West as to whether he  
actually intended to retire. The situa-  
tion developed in these states evi-  
dently has made an impression upon  
the party leaders that has stirred  
them to action.

Senator Aldrich would not discuss  
his call on the president.

The senator talked with the presi-  
dent regarding his rubber statement  
and Mr. Taft listened with great in-  
terest. Mr. Aldrich also told Mr. Taft  
of his plan to make a speech during  
the fall in one of the Western states  
defending the Payne-Aldrich act as a  
whole and particularly replying to the  
charges made in reference to the cot-  
ton schedule.

## BOY KILLS HIS SHOOTMATE

Marinette, Wis., Lad Shoots Companion  
Fatally.

Marinette, Wis., Aug. 13.—John Mur-  
phy, five-year-old son of J. B. Murphy  
of Channing, Mich., was killed by  
Dyas Seecole, aged thirteen. Seecole  
is under arrest, charged with murder,  
and it is said that he has confessed.

The motive was the fact that Mur-  
phy's parents had forbidden him to  
play with Seecole. The story is that  
young Seecole found a shotgun on a  
woodpile, and as the Murphy lad was  
trying to escape shot him in the back  
of the head. Death was instantaneous.  
After killing him he secreted the body  
in the bushes, where it was found by  
a searching party.

## A Volcano.

"What is a volcano?" asked the  
teacher.

"A mountain with a fire inside,"  
said one.

A smile of comprehension spread  
over the puzzled face of the smallest  
pupil as she asked surprisedly, "Is that  
a mountain range?"

GALLAGHER SORRY  
HE SHOT GAYNORNew York Mayor's Assailant Ex-  
presses Regret for Act.

New York, Aug. 13.—Another day  
has passed and Mayor Gaynor shows  
no symptoms of blood poisoning. He  
continues to rest well, to take nourish-  
ment when desired and, if the bullet-  
tins his surgeons are issuing disguise  
nothing, his condition is favorable to-  
ward ultimate recovery. The danger  
of blood poisoning is not yet passed,  
however, nor is the possibility that an  
artery or a blood vessel has been  
scraped by the bullet.

There were reports that the mayor's  
temperature had increased slightly  
during the afternoon, but no bulletin  
to this effect was issued.

One of the most cheerful statements  
came from the mayor's son Rufus, who  
said:

"Barring accident, Mayor Gaynor's  
recovery is practically assured."

Concerning an operation Mr. Adam-  
son, the mayor's secretary, took the  
same view heretofore expressed by  
the physicians.

"They won't operate unless it is ab-  
solutely necessary," he said.

The first words uttered by James J.  
Gallagher, the mayor's assailant, when  
he awoke in his cell in Jersey City,  
were "how is Mayor Gaynor?"

"He is said to be getting along nice-  
ly," replied the warden, and Gallag-  
her went on:

"Well, I am glad he is recovering. I  
am sorry for my act."

## APPEAL TO THE PRESIDENT

South Dakotans Want Land Ruling  
Modified.

Huron, S. D., Aug. 13.—A conference  
called at the request of business men  
of Lemmon, S. D., and of Harding and  
Perkins counties held a session here.  
The object was to induce President  
Taft to modify the rules governing  
the order withdrawing from home-  
stead entry certain lands in the coun-  
ties named which are said to be un-  
derlaid with lignite coal. Appeals to  
the secretary of the interior for the  
modification of these rules have been  
unsuccessful and the conference was  
for the discussion of recommendations  
to President Taft for relief from the  
distress that will result to settlers  
within the district involved, many  
having made homestead entry upon  
the lands that will be withdrawn if  
the rules are enforced. Among those  
at the conference were Governor John  
Burke of North Dakota, Governor Ves-  
sey, United States Senators Gamble  
and Crawford, Congressman Martin,  
Hon. P. D. Norton of Hettlinger and  
Hon. Logan Berry of Lemmon.

It was determined to send to the  
department at Washington a recom-  
mendation addressed to Hon. Frank  
Pierce, acting secretary of the in-  
terior. The bearers of the message  
are Governor Vessey, Hon. Logan  
Berry and Hon. D. P. Norton, who  
have left for Washington.

## Five of Party Drowned.

Toronto, Can., Aug. 13.—A yacht  
containing twelve persons was run  
down in Toronto harbor by a ferry-  
boat. Miss Norma and Miss Olive  
Jaffray and Miss Esther McMahon  
were drowned. Robert Jennings and  
John Pierce are missing.

Brigands Capture Rich Cardigan.  
Rome, Aug. 13.—The mystery of the  
disappearance of Salvatore Seta, one  
of the richest land owners in Sar-  
dinia, was solved when brigands, who  
kidnapped Seta on his big estate, de-  
manded \$10,000 for his ransom.

BIG FEES FOR  
THE LAWYERSIndians Gave Attorneys Large  
Sums of Money.

## THEY HAD TO COME ACROSS

Red Men in Oklahoma Never Received  
Large Amounts of Money Due Them  
Without Having to Pay Liberally  
for Legal Advice, Although They  
Employed Regular Lawyers on  
Yearly Salaries.

Sulphur, Okla., Aug. 13.—Lawyers'  
expense accounts, running as high as  
\$400,000, a single fee, already paid,  
amounting to \$750,000 and contingent  
fees still pending that would aggre-  
gate about \$5,000,000, figured in the  
Indian land investigation.

It was pointed out that the Indians  
never had secured large amounts of  
money due them without having to  
"come across" in the shape of fees,  
and, although they employed regular  
lawyers on yearly salaries, extra fees  
were paid constantly for the employ-  
ment of special counsel.

The special fee of \$750,000 was paid  
several years ago to J. F. McMurray  
and his law partners, after they had  
prosecuted what are known as the  
"citizenship case," which it was stated  
kept off the rolls 32,000 persons who  
wanted to participate in the claims  
against the government.

By the winning of this suit, it was  
explained that the value of the prop-  
erty to the Indians who remained on  
the rolls was enhanced \$16,000,000 on  
a basis of \$5,000 for each of the 32,000  
claimants who were kept off. The sale  
of the property and the division of the  
proceeds is still being fought for by  
the Indians.

This testimony developed in the ex-  
amination on George F. Scott, a Choctaw  
lawyer. Scott was active in securing  
signatures for the McMurray con-  
tracts, to promote the approval of  
which by congress Senator Gore  
charged that he was offered a bribe of  
\$25,000 or \$50,000.

McMurray's contracts, Scott testi-  
fied, would dispose of about \$50,000,  
000 worth of property, which on a 10  
per cent "attorneys' fee" basis would  
result in a net profit to McMurray and  
his associates of almost \$5,000,000.  
This fee, according to Senator Gore  
and members of the committee who in-  
terrogated the witnesses, would be  
paid for services that the government  
had already promised to give the In-  
dians without cost. Scott also showed  
in his testimony that the cost of em-  
ploying McMurray would be in addition  
to \$30,000 now paid annually to  
regular attorneys.

## Urged Approval of Contracts.

It was he who testified he had sent  
telegrams to Washington, urging the  
approval of the contracts. In one tele-  
gram to Richard Adams, an attorney  
at Washington, he referred to Vice  
President Sherman and Senator  
Charles Curtis of Kansas as "under-  
standing better than any one else  
what the Indians wanted."

Questioned as to what he meant by  
that, Scott said he understood Mr.  
Sherman and Senator Curtis long had  
been familiar with Indian affairs, and  
he thought they were the ones to be  
appealed to, notwithstanding it had  
been shown that both Mr. Sherman  
and Mr. Curtis had protested against  
the 10 per cent fee. They held it to be  
too high and unnecessary.

On cross-examination, the witness  
said the department of the interior  
sometimes had complained concerning  
his method of cashing warrants for  
money due against the nation. He  
said he sometimes had favored friends  
in making payments when his au-  
thority for so doing was in dispute.

"Did you ever make any payments  
after that?" asked Representative  
Miller.

"Yes, I believe I did, but it was  
when the act itself was in dispute."

"Then, you admit that you violated  
the order from the department?"

"I understand it was the opinion of  
some lawyers that I had the right to  
make the payments."

"Did McMurray ever give you money  
for the work you were doing for him?"

"He gave me \$3,000 once for ex-  
penses and some money I had collect-  
ed as fees, about \$1 a head, I believe,  
for each of the 1,000 tax case con-  
tracts which I had secured."

In the 8,000 tax cases which formed  
a suit to prevent the government from  
collecting taxes on allotted lands,  
Scott said McMurray was to get \$10  
for winning each case, or \$80,000 for  
winning the cases collectively.

"Do you mean to say the Indians  
were going to pay \$80,000 for agree-  
ing to that which was virtually one tax  
case?" asked Representative Saun-  
ders.

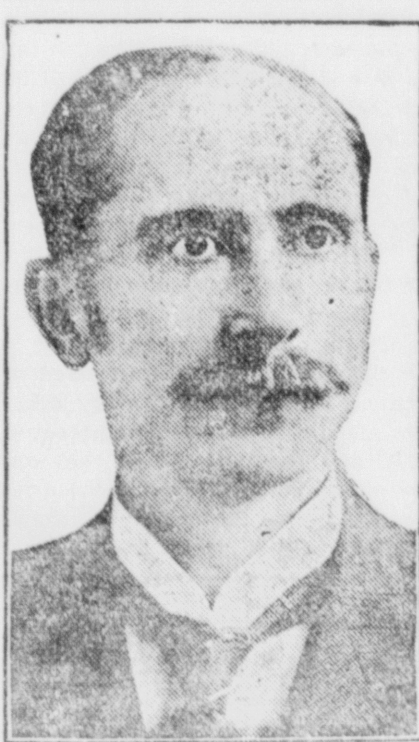

"Yes, \$10 a case, or \$80,000 for the  
lot."

McMurray may be put on the stand  
within a few days to relate what he  
knows concerning what inducements,  
if any, were made to the Indians be-  
fore they signed the contracts.

## Charges Against Police Chief.

Des Moines, Aug. 13.—Charges of  
maladministration in office and of  
flagrant neglect of duty were filed  
against Chief of Police George Yeager  
with the city council. The charges  
were filed by W. C. Barber of the Anti-  
Saloon league and the council is asked  
to remove Yeager pending an investi-  
gation.

Fire Threatens to Destroy the Town of  
Taft, Ida.

Spokane, Wash., Aug. 13.—Taft,  
Ida., in the Coeur d'Alene district, with  
its 200 homes, may be swept off the  
map by forest fires raging in the sur-  
rounding hills. The flames are now  
eating their way down the mountain  
sides, and it is feared the force of the  
fire fighters and troops cannot save  
the place.

Washington, Aug. 13.—Conditions  
on the Flathead Indian reservation in  
Montana continue to grow worse. A  
telegram received by Acting Secretary  
Pierce of the interior department from  
Superintendent Morgan of the reser-  
vation reported the situation more se-  
rious than ever and appealed for as-  
sistance of additional troops. Two ad-  
ditional companies will be rushed to  
the reservation.

A severe fire has broken out along  
the right of way of the Great North-  
ern railway in the new Glacier National  
park in Montana, according to a  
telegram received here.

FARMER SAID TO  
HAVE CONFESSEDMinnesota Man Admits Killing  
Two Children.

Montgomery, Minn., Aug. 13.—Mar-  
tin O'Malley, a farmer residing in the  
western part of this county, who was  
released from custody two weeks ago  
on a charge of poisoning his two step-  
children, there not being sufficient evi-  
dence, was again arrested by Pinker-  
ton men, who worked two days and  
nights on the case.

O'Malley finally confessed, after  
which he was lodged in the county  
jail to await a hearing to be held the  
latter part of August. O'Malley, who  
was a widower, forty-two years old,  
with seven children, married Mrs. Pra-  
gel of this city, a widow with three  
children.

Two of her children were taken  
sick. In his confession he admitted  
giving them medicine in which he  
mixed a quantity of poison, increasing  
the dose each time. Suspicion was  
aroused after the children were bur-  
ied. The bodies were exhumed and  
the stomachs sent to the state chem-  
ist for analysis. He found poison in  
them. The only motive suggested is  
that O'Malley wanted to get the chil-  
dren out of the way. He does not say  
why. The work of County Attorney  
F. J. Hanzel and the Pinkerton men  
resulted in the arrest. His wife has  
not lived with him since the death of  
the children. She was not aware of  
the fact that he had poisoned her chil-  
dren until their bodies were exhumed.  
A doctor at La Crosse diagnosed the  
cases as infantile paralysis.

## ROBBERY PROVES A MYSTERY

Last of Three Bank Notes of High  
Denomination Found.

Superior, Wis., Aug. 13.—The \$15-  
000 registered mail robbery at the  
postoffice is as much of a mystery as  
ever. The last of the three \$5,000  
bank notes has been found, however.

It seems that they were discarded  
when the thief opened the letter and  
found he could make no use of them.  
The third one was found before the  
others by a city fireman who, on see-  
ing that the note was made payable  
to "ourselves" by the firm issuing it,  
concluded that it was some worthless  
blank filled out in play by a child and  
then thrown away.

The finding of the notes furnished  
but little clue to the thief, however.

## The Man With the Iron Mask.

The Man With the Iron Mask was  
a mysterious French prisoner of state,  
whose identity has never been satis-  
factorily established. He was closely  
confined under the charge of M. de St.  
Mars at Pignerol in 1679, at Exilles in  
1681, at Sainte-Marguerite in 1687 and  
finally was transferred to the Bastille  
in 1698, where he died on Nov. 19,  
1703, and was buried the following  
day in the cemetery of St. Paul under  
the name of Marchail. Dumas made  
him a twin brother of Louis XIV.

President Hill Denies Rumor Regarding  
Fargo-Minot Line.

Fargo, N. D., Aug. 13.—Great sur-  
prise has been caused here over the  
report that the contractors on the  
Great Northern cutoff between Fargo  
and Minot have been called off the  
work. Two-thirds of the grade has  
been ironed. No explanation is given.

President Louis W. Hill denied the  
report that orders had been issued to  
abandon the Fargo-Minot cutoff. It  
was stated that probably the ground  
for the report was that a good many  
of the laborers were quitting railroad  
work for the bigger pay offered in the  
harvest fields.

## Killed by a Train.

Durand, Wis., Aug. 13.—Edward  
Nussberger, aged thirty years, a farm-

city, was struck and instantly killed  
by train No. 69 on the St. Paul road.  
He had attended a dance in the city  
and was returning home. He fell  
asleep on the bridge. Owing to a  
sharp curve on the bridge the engi-  
neer could not see him until he was  
within a few car lengths.

If you are a game protector and at the same time desire a few dollars for your trouble all you have to do is to catch some one at it and make an example of him. It is not necessary to wait for the real game warden with a star on if you are in earnest in wishing to see some one punished for killing game birds out of season.

Despite the reports that the government order to put the lid on at Moorhead was a bluff and would not be carried out every saloon keeper in that city is in receipt of an order from the government which provides that their places of business must be closed by Sept. 15th, and all stocks of liquor must be removed by that date or they will be confiscated by the government. It is the beginning of the end of the liquor traffic in that city and the local dealers now so regard it.

The Little Falls Transcript offers sympathy to Brainerd owing to the fact that we have a carnival attraction for next week. We don't need the sympathy. Sister Fuller, for

every dollar spent at the carnival means just that much additional money spent in beautifying the city park system which some day in the near future will equal the parks of any city in the state if the present spirit of progressiveness is shown. The carnival attraction is handled by the park board and the benefits received are strictly accounted for and applied to park improvements. Come on up to the carnival and help swell the fund.

The owners of vehicles are preparing to resist the wheelage tax imposed by the city of Duluth. The Herald says it should be taken to the courts and hopes the verdict will be against those who own and operate wheeled vehicles so it will be forever settled, and adds that the theory of double taxation is wrong as the owner of a vehicle pays a personal tax on it and while the wheelage tax sounds like a second tax it is in reality a license fee for the use of the streets, and a sort of repayment to the city for the damage involved in such use. Duluth, and every other city, needs a street maintenance fund, and the outcome of the controversy which will be carried to the courts for settlement will be watched with interest.

The Misses May and Anna Smith, of Evanston, Ill., arrived this afternoon from St. Paul to visit Mr. and Mrs. Thos. Cosgrove. This is their first visit in Brainerd and they will stay a week. "Evanston," said Miss May Smith, "has grown wonderfully. It was formerly about eight years ago referred to as a suburb of Chicago. But now the university town has a population of over 30,000 and is one of the prettiest cities in northern Illinois. Many improvements have been made to Northwestern University and it holds high rank as a prominent university."

Pricked His Own Bubble. This story, found in Rev. Dr. Henry H. Jessup's book, "Fifty-three Years in Syria," seems to indicate that religious vagaries are as short lived in the east as elsewhere. A friend of Dr. Jessup, visiting Jerusalem, met a queer looking solitary stranger pacing the streets of the city, accosted him, and after the usual greetings remarked:

"You are an American, I infer."

"Yes, I am," replied the queer looking man.

"And what are you doing here, if I may ask?"

"Ah, yes, I'm glad you asked. You see, I've come to preach the new doctrine, that there is to be no more death. If men will only accept it, we'll abolish death, and there'll be no more dying. We shall just live right on."

"But," said Dr. Jessup's friend, "supposing you should sicken and die, what then?"

"Oh," said the man, "that would bust the whole thing!"

And it did. The poor delirious apostle died a few months later, and with him his "new doctrine."

## SOFT COAL IS DESTROYING NOTED ENGLISH BUILDINGS

Oxford Factory Chimneys Rot Stones of University Buildings.

Recent local legislation in England which forbids factory owners to permit black smoke to issue from chimneys does not touch the equally sooty smoke from the soft coal used in millions of old fashioned English grates and kitchen ranges.

It is not only in London that the smoke laden atmosphere rots the stonework and is a menace to historical buildings like Westminster abbey. According to the Local Government Review, large quantities of the blackest smoke are issued from factory chimneys in and about Oxford.

Over the stones of its colleges there is a deposit of soot. The acids held in the soot blister the surfaces of the stones. After a time that blister falls, leaving a rough, crumbling surface, the precursor of rapid decay. An informant officially connected with the university has said that he has little doubt that the decay of the stonework of the older buildings has been greater in the nineteenth century than in any former century, and this is due to the increased use of coal.

The paper gives also particulars of the damage to portions of Canterbury cathedral by smoke, especially to the great Angel tower, on which the cathedral authorities have spent a large sum in repairs. As regards Exeter cathedral, a noble edifice 800 years old, the writer says that soot has eaten its way into all parts of the delicate tracery of the western front of the structure. Efforts have been made with more or less success to remedy and to replace, but the ancient glory has largely departed.

## MAKE A COLLEGE TO ORDER.

Oregon Follows Example of Trinity in North Carolina.

Announcement of the plan to make to order a college in Oregon under the leadership of Professor William Trufant Foster recalls other examples of American educational institutions which have been built around ample endowments. While there is none, perhaps, so entirely made to order as Reed college will be, Trinity college at Durham, N. C., furnishes a somewhat parallel case in that the old basis of a poverty stricken Methodist Episcopal school was practically of no financial importance when the new patrons began to pour money into the treasury a dozen or more years ago.

The tobacco manufacturing family of Dukes, in Durham, caused Trinity college to be transplanted from a country town to the tobacco center, and there, practically under the walls of a great cigarette factory, has been built a totally new Trinity, with ample funds, talented professors and elaborate laboratory equipment.

The president, who has been the Dukes' educational spender, is the Rev. John C. Kilgo. Trinity now has about 475 students and nearly forty members of the faculty. In proportion to its numbers it is the best endowed college in the south and one of the wealthiest anywhere, and the money continues to come in as fast as it is needed.

## Exact Thomas.

Thomas Hoar, the devoted servant upon whom Gilbert White, the English naturalist, depended to carry out his garden plans and to look after his comfort in many ways, was noted for his exactness. Mr. H. C. Shelley, in "Gilbert White and Selborne," gives an amusing illustration.

There was one occasion when Thomas came to report, "Please, sir, I've been and broke a glass."

"Broke a glass, Thomas! How did you do that?"

"I'll show you, sir," he rejoined as he disappeared for a moment. Returning with a glass in his hand, he let it fall on the floor, remarking:

"That's how I broke it, sir."

"There, go along, Thomas; you are a great fool," said his master, adding to himself, "and I was as great a one for asking such a foolish question."

## Getting an Autograph.

A Munich boy of fourteen, who had seen and admired many of Rudolf von Seitz's paintings, was anxious to secure the painter's autograph, but did not know how to go about it. After much thought he wrote a letter, stating that he had sent a case of wine to the professor's address, and wanted to know whether it had been received. Thinking the matter of sufficient importance the painter did not write, but called at the address given, met the boy's mother, and the fraud soon became apparent. The boy was thoroughly scolded, and next day received this autograph note:

It often happens here on earth that little rogues to great ones grow. Some autographs for which you're trying can be procured without much lying.

## Jungle Housekeeping.

The negro housewife in the West Indian jungle finds housekeeping very easy. Fruit and vegetables grow wild all about the hut and the river abounds with fish. On wash day all she has to do is to pick a few of the berries of the soap berry tree, take her clothes to the river and use the berries as she would use ordinary soap. Even her cooking pots grow on the trees, the calabash cut in halves being used for this purpose. Calabashes are used also for bowls, basins and jugs for carrying water from the river, while the small ones make excellent cups. In the afternoon, when she is ready for her cup of tea, the negress picks half a dozen leaves from the lime bush growing at her door, boils them, squeezes the juice from a sugar cane for sweetening and the cocoanut supplies the milk. Thus she has a delicious cup of tea without depending on the grocer for it. She makes the mats for her floor out of the dried leaves of the banana, plaited and sewed together as the old country people in this country make their rag mats.

## Not For Himself.

"It does me good to see a pompous man get his," said a stockbroker. "I have a friend who just about believes the Lord created the earth in seven days for his especial benefit. He has a fine home on Long Island, with a retinue of servants, but his wife is a semi-invalid, and it falls to the lot of Mr. Pompous to execute various commissions for her in the city. The other day she asked him to stop at a clothing store and get a couple of white duck jackets for the butler. I happened to be with him when he entered the store. Striding majestically up to a sallow little salesman, he said, with much impressive dignity: "I wish to purchase a couple of white walters' coats."

"Yes, sir," said the little salesman. "What size do you wear?"

"Mr. Pompous got red in the face spluttered and gurgled, and then as if fearing to trust himself to speech turned on his heel and strode from the place. He left me at the next corner, and has avoided me ever since."—New York Sun.

## An Experience at Hull House.

Even death itself sometimes fails to bring the dignity and serenity which one would fain associate with old age. I recall the dying hour of one old Scotchwoman whose long struggle to "keep respectable" had so embittered her that her last words were gibes for those who were trying to minister to her. "So you came in yourself this morning, did you? You only sent things yesterday. I guess you knew when the doctor was coming. Don't try to warm my feet with anything but that old jacket that I've got there; it belonged to my boy who was drowned at sea high thirty years ago, but it's warmer yet with human feelings than any of your confounded charity hot water bottles." Suddenly the harsh gasping voice was stilled in death, and I awaited the doctor's coming, shaken and horrified.—Jane Addams in American Magazine.

## TO BUILD NEW R. R. FROM BRAINERD

H. Alfred Willard, a Capitalist of Washington, D. C., Examines For This Purpose

### TO TAP RAINY RIVER COUNTRY

J. McNelly, of Minneapolis, the Promoter, is Enthusiastic Over the Project

H. Alfred Willard, a prominent capitalist of Washington, D. C., and J. McNelly, a railway promoter of Minneapolis, were in the city yesterday examining the conditions here with references to putting in another railway to the north of Brainerd.

The object of the new railway would be to develop the new country from Merrifield to Cross Lake and running in a northerly direction would also tap the Rainy River country. The railway would connect with the Minnesota and International at Brainerd or very near it, would run to Cross Lake, thence to Longville, and then perhaps in a northeasterly direction to Deer River, where connections would be made with the Great Northern Railway. Others say the road might be extended to International Falls. The road will be assured of a heavy line of log, pulp wood and lath bolt shipments on its run north and its cars on the return trip south would haul the finished product. In addition there is the possible development of an ore district. Connections could also be made on the south to tap the Cuyuna Iron range region.

The gentlemen have returned to their homes and will be followed next week by a mineralogist, who will examine the route of the proposed railway with respect to the presence of mineral along the right of way. M. D. Stone was asked some time in February to make a reconnaissance for capitalists of Cleveland, D., who were examining the project.

### ERICKSON'S LAUNDRY BURNS

At Moorhead, Causing Loss of \$7,000 With an Insurance of but \$4,500

The Moorhead Independent contains the following account of the fire which destroyed the laundry of A. L. Erickson, formerly in the business in this city:

"Fire destroyed the building and contents of the Moorhead Steam Laundry Monday morning at 6 o'clock. The blaze had gotten such a start that the efforts of the fire department were unable to subdue them. The building is practically destroyed, together with a great deal of valuable machinery.

"Mr. Erickson, the proprietor, was out of the city at the time, having left on Saturday for a business trip to Newfönden. He was advised by wire of the fire and returned Monday morning.

"It is estimated that the building was worth \$2,500 and the machinery \$4,500 to \$6,000, and the insurance on the whole was \$4,500.

"Mr. Erickson bought out Zeller Bros. last March, and has enjoyed a large and increasing business. Mr. Erickson has announced his intention of rebuilding.

### \$100 Reward \$100

The readers of this paper will be glad to learn that there is at least one disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to a medical fraternity. Catarrh being constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up a constitution and assisting nature in doing its work. The proprietors do so much faith in its curative power that they offer One Hundred Dollars for any case that it fails to cure. Sold by all druggists. 75c. Address F. J. Cheney & Co., Toledo, Ohio. Sold by all druggists. 75c. Take Hall's Family Pills for constipation.

### SIMPLY CRAZY FOR HELP

Crops Much Better than at First Reported and Lack of Help is Retarding the Harvest

In a personal letter to the Dispatch an employment agent states laborers are scarce in the vicinity of Fargo, and adds: "Our office alone can place 500 men now at prices running from \$2.50 to \$3.00 a day. Crops are much better than first reported and can give them from 5 to 20 days work. Farmers are simply crazy for help. Teams are also in demand. None need be afraid that they won't find plenty of work. Girls are also in great demand for farm and hotel work at an average wage of \$5.00 a week, room and board."

### THIS IS THE CORN COUNTRY

The Northern Counties Seem to Have Withstood Drought Better than Southern Minnesota

The St. Cloud Journal-Press says N. K. Hunt has returned from a trip covering Stearns, Todd, Crow Wing and Cass counties. He says crops in western Stearns are good, better than in Todd or Crow Wing, but that the best corn he has seen this year was in Cass county, 50 miles north of Brainerd. This was on land recently opened up, and while of the jack-pine sand order, it stands the drought wonderfully well, and crops average well. At Pequot he saw good hay sold for \$6 a ton, and the livestock there do not expect to pay more than \$8 during the year. As good hay sells in St. Cloud for \$15 a ton, and much higher in the Twin Cities, there is a chance for some enterprising man to get busy with a haypress.

### NEW STORE OPENS SEPT 1

The Formal Opening Will Excel Anything Ever Seen in Brainerd, Occurring Middle Sept

The Dispatch representative called on Mr. Michael this morning and spoke to him regarding his new store in the Phillips building. Mr. Michael said his store fixtures had all been ordered and were either now in Brainerd or on the way to this city. The building is expected to be ready for him by about August 25th. He will move from his old location to the new store in the Phillips block September first.

The formal opening of the new store will occur in the middle of September and will excel anything of the kind ever seen in Brainerd. The new arrangements there will permit him to make a display of ready to wear garments as he has never been previously able to do.

### MORE CONTRACTS LET

The Brainerd Improvement Co. Lets Two More Contracts on its Building

The Brainerd Improvement Co. yesterday let two more contracts on its three story building now in course of erection. The first one was the heating contract. There were five bidders. Waterman & Waterbury, of Minneapolis, were the successful bidders.

The plumbing contract was awarded to Slipp-Gruenhagen Co., which firm was successful over five other bidders.

J. E. Nelson, of the Twin City Gas and Electric Co. will be here next week inspecting the building. He has the contract for the wiring of the block. One of the large contracts which the firm recently completed was the wiring of the new St. Paul hotel.

## PIKE FISHING CASES ON TRIAL

Case Against Ben Clark For Having Pike Illegally in Possession

### WITH INTENT TO SELL

Jury Drawn This Afternoon—First Case of the New Game Wardens Onstine and Quinn

The section 10 pike fishing cases were called this morning. The first case in the municipal court was the state vs. Ben Clark, arraigned on a charge of having pike illegally in possession with intent to sell the same, the game wardens charging further that such fish were caught in Gull lake, which body of water had been stocked by the state game and fish commission.

Attorney M. E. Ryan represented the defendant and County Attorney W. A. Fleming appeared for the state.

Attorney Ryan asked that the case against Clark be tried at the same time with the case against James Grasser. After some deliberations Judge J. H. Warner ruled that the cases would have to be heard separately.

Attorney Ryan asked for a jury trial for his client, Clark. Deputy Joseph Weitzel summoned a number of jurors of which over half were excused for various reasons. One man was no citizen, another pleaded exemption because he belonged to the fire department, another had his store to look after when his partner was gone.

In the end the following were being examined and will probably be the jury which tries Ben Clark, John Hurley, George Abbott, John Carlson, Wm. Deering, L. Staples, James Connors.

### Silver Tickets to State Fair

There will be one entrance to the state fair grounds this year where the only ticket required will be one of Uncle Sam's regular fifty-cent pieces. This is the entrance known as the "Iron Gate" at the corner of Langford avenue and St. Paul avenue. At this point will be installed patent turnstiles, with a mechanical money in-the-slot contrivance. The visitor to the fair will not be required to fall in line at the ticket window and lose five or six valuable minutes in waiting for his turn to purchase a ticket. Instead, he goes at once to the gate with the useful half dollar in his hand and deposits it in the slot, whereupon the turnstile swings once around and he finds himself inside the grounds.

This practical application of an old device will be given a thorough trial by the state fair management, and if it proves a success other money in the slot turnstiles will be placed at practically all of the entrances to the fair grounds next year. It means a saving to everyone—the fair management will not be required to pay for ticket sellers or ticket-takers while the patrons of the fair will be spared both inconveniences and loss of time. This feature will in itself add one more to the thousand and one interesting novelties which have placed the Minnesota State Fair so far in advance of all of its competitors.

### START TONIGHT

This is the time of year most trying on those inclined to be constipated. Many dread winter because of it. Don't worry, just take Hollister's Rocky Mountain Tea or Tablets, nature's surest, safest and best regulator. Take it once a week. Start tonight.

### WILL AITKIN COUNTY JOIN

In a Movement to Put Northern Minnesota on the Map by Equal Representation

The Aitkin Independent in its last issue contains the following pertinent article regarding the Northern Minnesota Development movement:

Will Aitkin county join the Northern Minnesota Development association, and identify itself with the work being carried on by that organization for the development of this section of the state? It appears to the Independent that our people have been singularly apathetic in matter, and that the conferences at Bemidji and Crookston ought to have been attended by Aitkin county boosters, the reputation of this county for progressiveness upheld, and her voice heard in the councils. But it is yet time to get into the movement. A meeting is to be held in Brainerd in December to formulate plans for a campaign in the legislature for legislation providing for reapportionment, the taxation of state lands for a fair share of the cost of building roads and schools so that settlement may be made possible. Thirty-one counties are interested, and \$3,000 must be raised for the necessary expenses of the association. Will Aitkin county do her share?

### Not Very Many.

"How many servants have you?" asked the census taker.

"Well," replied Mrs. Crosslows, "two have threatened to leave, one has promised to come, and it's everybody's afternoon off anyhow. You can figure it out for yourself."—Washington Star.

Peace is not mere tranquillity, for tranquillity may be indifference.—Duffield.

### TRAIN SCHEDULE CHANGES

The Northern Pacific Railway Will Put in a New Time Card on Sunday, August 14

Two trains will be taken off by the Northern Pacific Sunday, trains No. 15 and 16, running between St. Paul and Mandan, N. D., being discontinued.

Trains No. 7 and 8, which now run from St. Paul to Seattle, will only go as far as Glendive, Mont. The work of these trains will be done by trains No. 3 and 4, 5 and 6, and 41 and 42.

Train No. 11, operating between St. Paul and International Falls, will leave St. Paul under the new schedule at 7:00 P. M., instead of 6:30 p. m. and will reach Brainerd at 12:10 in the morning. This train will carry the through cars for M. & I. points and northbound.

No. 12, which now leaves Brainerd at 5:45 in the morning, will leave at 4:15 a. m., connecting with the M. & I. train from the north and reaching Minneapolis at 8:30 a. m. and St. Paul 9:00 a. m.

The afternoon train for the Twin Cities will probably leave Brainerd ten minutes earlier than at present.

### BACK FROM MARKET

H. F. Michael Makes Purchases in Chicago and Cleveland—Sees Knight Templars

H. F. Michael has returned from Chicago and Cleveland where he has been purchasing stock for his new store in the Phillips block.

He said it was his privilege to witness the Knights Templar parade in Chicago Tuesday, which required three hours and forty minutes to pass a given point.

"I never saw so many bands at one time in my life," said Mr. Michael. "There were one hundred in the line, and were all large bands. The largest headed the Illinois division and had one hundred pieces. The majority of the Templars were well drilled and it made a most beautiful sight. It was estimated that there were one million people who witnessed the parade."

"Street car traffic in the 'Loop' district was all stopped, and business was practically suspended. The electrical decorations were said to be the most elaborate that Chicago has ever witnessed."

### The Parker Shows

August 15 is the date set for the opening of the carnival to be held under the auspices of the Brainerd Park Improvement Association, when the Great Parker Shows, admittedly the premier enterprise now before the public in the carnival line, will play an engagement of one week in Brainerd.

In the line of carnival endeavor, this opening will mark an epoch, and bring into the limelight more clearly than ever before Mr. Con T. Kennedy, owner and general manager of the Great Parker Shows, who's sagacity, skill in meeting the public's demands and enterprise has set a standard which none of his competitors have been able to touch. The last few years have witnessed a remarkable change in the carnival department of public entertainment, the grafter and unreliable promoters whose operations were quixotic, whose promises held no foundation but air, and whose performances and exhibitions never fulfilled a guarantee, and were invariably criticized from every standpoint, have been succeeded by carnival aggregations organized and founded on sound business principles, operated, promoted and conducted by reputable and thoroughly reliable business men.

The large fortune that Mr. Kennedy has accumulated, and the prestige that he now enjoys in this particular field, evidences the fact that he has and his able lieutenants have struck the right key in their estimate of the public's wants, and the manner in which a carnival enterprise should be conducted to get the best results to everybody concerned.

It is an absolute fact that no better plan of amusement has ever been devised to create the get-together spirit in a community, to insure closer cooperation on the part of the members of a fraternal order or society than a carnival operated on clean, business lines, and of recent years the state fairs in particular have recognized this, and rely upon the carnival people almost entirely to provide their host of amusement features and attractions. The Great Parker Shows announce for this season the greatest aggregation of shows and features ever collected for an amusement enterprise of a like character. The Great Parker Shows will come to Brainerd in its entirety, and we are assured that the same good order will be maintained as elsewhere. The Parker people have established a sterling reputation for their clean, moral shows and attractions.

### P. O. STAGING COLLAPSES

Staging Eight Feet High Loaded With Cement Collapses—No One Hurt

The eight foot high staging at the new postoffice building on Sixth St. was being loaded up with cement this morning. The cement was being placed there so as to be in a handy place for feeding into the cement mixer. John Larson's team had drawn up with a load of the material and the driver J. Avery was passing the sacks from the team to the staging.

George Wiley, also working for John Larson, was on the staging. Suddenly it gave way under the constantly increasing weight and folded up almost burying Wiley among the sacks of cement. By some lucky chance he managed to avoid the falling planks and cement and came through the ordeal uninjured. He missed these but could not escape a barrel of water which also tumbled down and soured him completely.

### Empty Titles.

William Jennings Bryan once joked about our American fondness for titles. "You all know of the colonel," he said, "who got his title by inheritance, having married Colonel Brown's widow? But I once met a general who got his title neither by inheritance, nor by service, nor by anything you could mention."

"General," I said to him, "how do you come by this title of yours, anyway?"

"Why, sir," said he, "I passed my youth in the flour trade and for twenty-seven years was a general miller."

"I know another titled man, Judge Greene."

"Are you, sir? I once asked him, 'a United States judge or a circuit judge?'"

"I ain't neither," he replied. "I'm a judge of hoss racin'."

### Fear.

Fear causes more disease than do microbes, more deaths than famine, more failures than panics. It costs more than war, is always a failure and is never necessary, said a medical man. Fear weakens the heart's action, induces congestion, invites indigestion, produces poison through decomposing foods and is thus the mother of auto-poisoning, which either directly causes or greatly aids in the production of quite 90 per cent of all our diseases.

### Simplified Spelling.

"Why do you take Elmore away from school, Aunt Mahaly?" a lady asked her cook one day. Aunt Mahaly sniffed scornfully.

"Cause de teacher ain't satisfaction-ary tuh me, Mis' Mally. What you reckon she tell dat chile yistidy? She 'low dat IV spell four when even a idjut 'ud know dat it spells ivy."

### SIGNALS OF DISTRESS

Brainerd People Should Know How to Read and Heed Them

Sick kidneys give many signals of distress.

The secretions are dark, contain a sediment.

Passages are frequent, scanty, painful.

Backache is constant day and night. Headaches and dizzy spells are frequent.

The weakened kidneys need quick help. Don't delay! Use a special kidney remedy.

Doan's Kidney Pills cure sick kidneys, backache and urinary disorders.

Brainerd evidence proves this statement.

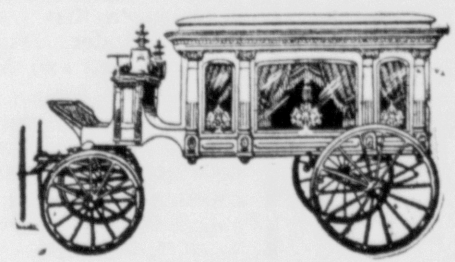

Oscar Opgaard, 611 S. Tenth St., Brainerd, Minn., says: "I speak from experience when I say that Doan's Kidney Pills are effective in removing backache and regulating the passages of the kidney secretions. Some time ago I procured this remedy from a local druggist, and in view of the excellent results I obtained from its use, I am thoroughly convinced that it lives up to the claims for it."

### A SAD STORY.

The Misfortune That Came With a Terrible Tumble.

Fowling is now very little practiced in the Shetland Islands, although many eggs are secured annually. Many thrilling stories of fowling adventure are told by the Shetlanders. A man who had undertaken to climb a certain steep cliff was neither very experienced nor very brave, although he boasted of being both. He pushed upward, however, briskly without looking behind until he had got up about 150 feet, when he stopped to breathe. The pause was fatal to his self-possession, and he called out in tones of terror, "Men, men, I am going—I am going." But he still held on for a little, and it was not till he had shrieked many times "I am going" that he did fall headlong.

His comrades, having thus been warned, moved the boat out of the way so that the poor fellow came sheer down into the deep water. Mighty was the plunge, but at length he rose to the surface, when of course he was instantly caught hold of and dragged into the boat. After many gasps and much spluttering of sea water from his mouth his only remark was: "Eh, men, this is a sad story. I have lost my snuffbox."—"Sketches and Tales of Shetland."

### MISSOURI LINGUIST BOOSTER.

Will Tell Immigrants Advantages of Show-me State.

Ellis Island will soon have a linguist wonder who will be able to understand pretty nearly all the would-be citizens who land there. He is Henry Gellert of St. Louis, and will be at the nation's gateway as a representative of the Immigration commission of Missouri to direct desirable aliens thither.

Mr. Gellert speaks six languages, German, English, French, Italian, Spanish and Swedish, besides many dialects of different sections of Europe.

## MAKE THEM LAUGH.

A Bachelor's Idea of the Way Children Should Be Trained.

"The people who don't have to do things can always do them better than the people who are obliged to do them," said the cynical bachelor. "If you want to know how to invest money, ask a fellow who has never had any to invest. I suppose it's the same with raising children. Nevertheless, I am fond of children, and never having had an opportunity of raising any of my own, I am critical about the way other people, more fortunate than I, raise theirs.

"My brother has a youngster, a boy about six years old, and everything that kid wants he cries for. The minute he begins to cry he gets it, which, according to my reasoning, is all wrong.

"Why not make him laugh for it? It's just as easy for a child to laugh as to cry, and it's far more healthful, besides being much more cheerful for the surrounding populace.

"I've tried the experiment with him, and it works like a charm. If I happen to have anything he wants, and he cries for it, I make fun of him. 'That isn't the way to get it,' I say. 'Don't cry for it. Laugh for it!'

"It took only about two lessons for him to understand this, and you have no idea what a wonderful difference it has made in the disposition of that kid. Still, I'm only an old bachelor, and I'm not supposed to know anything about such things."—Philadelphia Ledger.

## Took an Unfair Advantage.

Mrs. Dorkins—Yesterday I called Mrs. Grudgins' attention to the fact that she had left the gate between our back yards open and that her chickens had come through and scratched up our flower beds, and she looked as if she would have liked to bite my head off. How foolish it is for people to get angry when you remind them that they have been careless about something they had no business to overlook!

Mr. Dorkins—I am glad to hear you say that, Maria. You won't mind if I mention that when I came home last night I found that you'd left both the back doors unlocked.

Mrs. Dorkins—Yes; you're always watching to see if you can't catch me in some little fault, and it makes you perfectly happy when you do!—New York Tribune.

## HUNTING THE WALRUS.

The Eskimo Takes Advantage of the Animal's Curiosity.

In his frail skinboat it is a difficult and dangerous task for the Eskimo to go out to sea forty to sixty miles and intercept the walrus as he passes on his migration into the Arctic.

One carcass will fill his boat, for it weighs from 1,000 to 3,000 pounds. He hunts the walrus when they are lying asleep on the ice floes in herds from ten to several hundred. Death must be instantaneous, else with a few rolls or the peculiar lumbering, humping movement (seen of the seal when ashore), he makes the few feet to the water and then is lost, as he has not sufficient blubber and air to float. He has much natural curiosity, and if not scared by shots will come up close to your boat or the ice floe on which you are sitting, snorting, snorting and rolling his eyes; with his gleaming tusks and bristled snout he has an uncanny, goblin, monster-like appearance. A herd of fifty or sixty of them will come up en masse, raise high out of the water to stare at you, then snort, spurt and disappear again, only to come up on the same spot and repeat the maneuver indefinitely. Taking advantage of this the Eskimos hide behind ice hummocks and throw a harpoon into one, then snub the tough rawhide line around an ice cake. He must persevere come up to blow, and he is then killed with the rifle. The thick skin and the mass of blubber and meat beneath render him almost invulnerable.—Pacific Monthly.

## The Pardon Paperweight.

Under the headline "A Queer Mule Gift" a Vienna paper tells this story: "In the year 1860 a private soldier stationed at Sass killed an officer of his regiment and was condemned to be shot. Comrades who knew the extenuating circumstances, friends, priests, relatives—all pleaded in vain for mercy, the colonel in whose hands the matter rested insisting on the death penalty. The day came and the man was taken to the place of execution. Six members of his regiment, armed with rifles, one of which contained a blank cartridge, took their places as executioners. The man's eyes were bandaged and with arms securely pinioned he stood ready for the volley, shouting 'Comrades, aim well!' when a mounted courier dashed into the crowd waving a white flag, crying 'Pardon!' He was Lieutenant Baron du Mont, with the colonel's pardon, which would have been useless had it arrived one minute later. The municipality secured the five bullets from the firing squad, had them silvered and mounted in the form of a tiny pyramid on a silver plate, and this, suitably inscribed, is known as the 'pardon paperweight,' the only one of its kind."

## The Useful Crocodile Fish.

In the rivers and lakes of the Mexican state of Tabasco there swims a fish known as the "crocodile fish" which is most useful to man.

The skin of the crocodile fish, if properly cured, may be utilized for any of the purposes for which the lighter weights of leather are employed. The oil of the crocodile fish is a perfect lubricant and also used for softening leather. In addition to its qualities as a lubricant and emollient, the oil possesses medicinal qualities for which a superiority to the finest of Norwegian cod liver is claimed. The flesh of the crocodile fish is extensively used by the natives as food and highly relished by them as one of the delicacies of the country. Crocodile fish range in length from ten inches to four feet, and when dried assume an ashen hue, with lighter shades of a bluish tint.—New Orleans Times-Democrat.

## Poor Human Nature.

The woman who had succeeded in that rather difficult task—making a boarding house pay—was confiding to a friend some of the tricks of the trade.

"While you must never allow your boarders to get too far behind in their payments, it is also true that you will profit considerably by allowing them a little leeway. So long as you are sure of your money it pays a landlady to have her boarders a week or two behind in their board."

"I don't see that," interrupted her friend.

"Well, I'll tell you," continued the landlady. "When a man owes back board you have him at a certain disadvantage. Not one in a hundred under such circumstances has the nerve at mealtime to ask for a second helping."—New York Times.

## The Human Lobster.

The lobster has always appealed to the Englishman as affording a nickname for his fellow Englishman. "Lobster" was a favorite term of abuse among the Elizabethans, though it is only conjectured that an allusion to red faces was conveyed. As signifying a soldier, "lobster" originated in the civil war, being applied to the Roundhead cuirassiers, as Clarendon explains, "because of the bright iron shells with which they were covered." Afterward the allusion was transferred to the soldier's red uniform. But that was the "boiled lobster." The "raw lobster" was naturally the man in blue, the policeman. In earlier days we find Grose explaining that "to boil one's lobster" meant for a clergyman to become a soldier.—London Chronicle.

## Something to Live For.

Three little girls were playing. The mother of one came into the room and engaged the children in conversation.

"Marian, what are you going to be when you grow up?" she asked.

"I am going to be a famous singer," she replied.

"And you, Susie, what are you to be?"

"Oh, I am going to write stories when I grow up," she answered.

"And what is Marjorie to be?" continued the mother.

Marjorie, aged five, thought seriously a moment, and then said, "Well, I am not sure, but I think I'll be a widow."

## FORCE OF GRAVITY.

How It Would Affect Man's Weight on the Celestial Bodies.

If the planet Mars were really inhabited the people who live there must be an exceedingly agile race. The average weight of a man is about 140 pounds, but the force of gravity on Mars is so much less than on the earth that the 140 pound man would weigh only fifty-three pounds if he were transported thither. With such light weight, and still retaining the same strength, an individual would be able to run with the speed of an express train, go skipping over ten foot walls and do various other extraordinary things. On the moon a man would be even lighter.

But on the sun our 140 pounder would have his troubles. Instead of being an airy individual he would weigh in the neighborhood of a ton and three-quarters. He would probably have the greatest difficulty in raising his hand, for that member would weigh about 300 pounds.

According to scientific computation, a man who on earth weighs 140 pounds would on the other celestial bodies weigh as follows:

The moon, 23 pounds; Mars, 53 pounds; Venus, 114 pounds; Mercury, 119 pounds; Neptune, 123 pounds; Uranus, 127 pounds; Saturn, 105 pounds; Jupiter, 371 pounds, and the sun, 3,871 pounds.—Chicago Tribune.
